EDUCATION

Carleton University

Ottawa, Ontario

B.ENG in Software Engineering

Expected Graduation, April 2028

- **GPA:** 3.85/4.00, Dean's List
- **Related Coursework:** Data Structures & Algorithms, Objects & Design, Computer Organization & Programming, Combinatorics, Machine Learning, Artificial Intelligence, Object-Oriented Programming

EXPERIENCE

Websiteous

Ottawa, Ontario

Contract Web Developer

Dec 2023 – Jun 2025

- Designed, coded, and deployed **10+ dynamic client websites** using WordPress, PHP, JavaScript, HTML5, and CSS3, optimizing for responsive performance across desktop and mobile.
- Collaborated with clients to **translate business goals into scalable technical solutions**, implementing features such as custom booking systems, API-integrated order trackers, and interactive dashboards
- Engineered **modular plugin extensions and reusable components**, reducing future development time per project by ~35%.

Super League Ottawa

Ottawa, Ontario

Web Developer

Mar 2023 – Dec 2023

- **Designed, built, and maintained responsive web pages** for superleagueottawa.com, improving **user navigation, mobile performance**, and overall **site accessibility** for hundreds of monthly visitors.
- Developed **reusable UI components**, optimized layouts, and enhanced **page load times** using **HTML, CSS, JavaScript**, and modern **frontend frameworks**.
- Collaborated with league operations staff to implement **real-time schedule updates, standings**, and **registration workflows**, ensuring accurate and timely information across all divisions.
- Managed **version control** and iterative site updates through **Git-based workflows**, improving **release consistency** and reducing site-related issues reported by users.

PROJECTS

Client Websites (Websiteous)

Dec 2023 - Jun 2025

- Designed, developed, and deployed responsive business websites using WordPress, PHP, HTML5, and CSS3 as well as some Javascript and React.
- Applied SEO best practices, resulting in a **20–30%** increase in search visibility for local businesses within three months of launch.
- Delivered polished, user-friendly platforms that increased client engagement (e.g., average session duration up **25%**) and generated a noticeable increase in customer inquiries.

C Backend System for Crypto/Stock Portfolio Management

Personal Project

Dec 2025 - Jan 2026

- Built **HTTP backend in C** using sockets/pthreads, managing API requests without frameworks.
- Integrated **SQLite at the C level** for persistent asset and transaction storage
- Focused on **low-level systems concepts** including memory management, concurrency, and raw HTTP/JSON processing while supporting a modern React frontend.

SKILLS

Programming: Java, Python, JavaScript, HTML/CSS, SQL, Node.js, React.js, C++, C, C#, Assembly, Typescript, PHP, Wordpress, Firebase, Express, Object-Oriented Programming, Computer Architecture

Tools: Docker, AWS, Git, Bootstrap, Spring Boot, Agile, Vercel, Netlify, Postman
